

Business Requirements Document (BRD)

Tata Pla

Tata Play Fiber Mobile Application (MAPP)

1. Executive Summary

Tata Play Fiber (TPF) is launching LIT (Live Internet TV) - a value-added subscription service that delivers live television channels and bundled OTT content over the internet to existing fiber broadband customers. LIT is positioned as an add-on to the core fiber plan, with subscription validity aligned to the customer's fiber plan lifecycle.

dashboard
states: Fib
subscription

2. Background & Problem Statement

2.1 Current State

Today, Tata Play Fiber customers subscribe to internet-only plans through MAPP. Live TV and OTT content are not natively manageable within the fiber app. When LIT is introduced as an add-on, subscribers who purchase it need a self-service mechanism to:

- Understa

Without a dedicated Manage LIT journey in MAPP, LIT plan changes and cancellations would require:

- Contact

Integrate a Manage LIT module within MAPP that:

1. Surfaces

Module C - Existing Fiber, No LIT (Purchase Flows)

C.1 Purpose

Customers with active fiber but no LIT subscription can discover, evaluate, and purchase LIT through four entry paths designed in the FigJam board.
